The American Association for the Advancement of Science (AAAS)’s Science and Technology (S & T) Policy Fellowship is a post-graduate level fellowship that offers medical doctors, scientists, and engineers the opportunity to contribute their analytical skills to policymaking in Washington D.C. while learning about the role of science in the federal government. More than 2,200 scientists and engineers have received the fellowship since 1973, and opportunities are available in more than 30 Congressional offices and 15 federal agencies.

Application requirements
- U.S. citizen
- Must have a terminal degree (PhD, MD, DVM, etc.) in any scientific discipline
- A master’s degree in engineering with three years of post-degree experience
